ACNE

THE MOST ADVANCED SKIN CARE IN THE WORLD

has been clinically proven to rapidly improve acne skin conditions.

Before

After

CHANGING THE FACE OF ACNE

AGERA® skincare is a revolutionary method for treating acne with a combination of skin peels and advanced skin care products. This system has been clinically proven to dramatically reduce bacteria, blocked pores and skin discoloration associated with acne. The rapid control of acne symptoms is essential to minimise the risk of future scarring.

DELIVERING CLEAR RESULTS

AGERA® Acne skin peels

These unique peels are non-irritating and cause no down time from skin shedding or redness. AGERA® acne peels help control bacteria while reducing blocked pores.

For optimal results, a series of AGERA® acne peels may be combined with microdermabrasion to help remove blackheads and diminish existing acne scars.

Cleansing the skin

AGERA® cleansers have been formulated specifically for oily and acne prone skin and leave the skin feeling clean and refreshed.

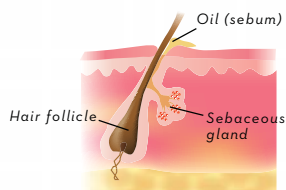

Controlling bacteria

AGERA® formulations use highly active peptides to reduce bacterial causes of acne while stimulating collagen and elastin without irritation.

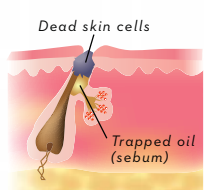

Preventing and controlling acne

AGERA® uses AHAs and BHAs (salicylic and L-ascorbic acids) to provide significant results by reducing inflammation, decreasing bacteria and preventing new acne eruptions.

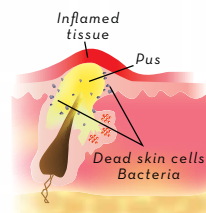

Acne Before Treatment:

Normal skin - before acne starts

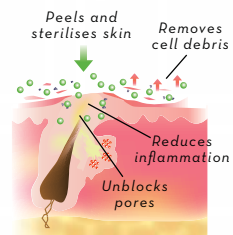

Development of blackhead

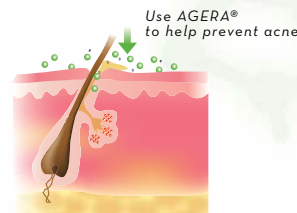

Development of severe acne

Acne During Treatment:
